Face scan access control

justface

Justface brings next-level access control

BEYOND KEYCARDS

In today's world of rising security threats and evolving risks, traditional access methods like keycards and codes are no longer sufficient. The shift to biometric access control is crucial to ensure higher security, efficiency, and convenience. Justface has developed a cutting-edge platform that enables organizations to transition seamlessly and compliant to facial recognition technology. By eliminating vulnerabilities associated with physical credentials, Justface enhances security while offering a frictionless and user friendly experience.

Now is the time to embrace biometrics and future-proof your access control systems.

Upgrade to
Justface biometrics

"Do I need to change administration system or hardware?"
No, you can easily upgrade your existing access control
system with Justface. You simply add it to your current
gates, cards, or chips, and it seamlessly integrates with
visitor management, economy systems, and more.

See how it works here

Unmatched security

Justface offers the highest precision facial
recognition with advanced features to
ensure the most secure access control.

Enhanced efficiency

Eliminate administrative tasks with
fast, hassle-free access that reduces
wait times and streamlines operations.

Data protection and compliance

Fully GDPR-compliant and D-seal certified,
ensuring top-level data security and
privacy for your organization.

A smart investment that adds more value to your existing infrastructure

Justface

Admin system

Infrastructure gate/door

Our cloud-based solution seamlessly integrates via API with your admin system and existing gates, doors, or turnstiles. Use JustFace as a standalone system or add it on to your current setup.

Reliable
and durable

Our approved hardware is certified for reliability, ensuring seamless integration, easy installation, and high security. Designed for both indoor and outdoor use, our solutions provide stable performance and trusted connectivity for any application.

Indoor tablet

A sleek, easy-to-install solution with WiFi connectivity, designed for seamless indoor access and effortless setup.

Outdoor tablet

Built for heavy-duty environments, our outdoor tablet is POE-cabled for a reliable, always-on connection and IP65 certified - perfect for demanding conditions.

IP65 CERTIFIED

justface

Versatile solutions for every industry

Justface access control is designed to meet the diverse security needs of various industries, ensuring the protection of people, assets, and intellectual property. Whether it's safeguarding critical infrastructure in high-security environments like IT and data centers, enhancing efficiency in production facilities, or providing seamless access for membership-based businesses such as fitness centers, Justface offers a reliable and scalable solution.

The world's leading biometrics solution

Justface offers the highest precision facial recognition with advanced features to ensure the most secure access control.

Highest accuracy
Advanced scanning technology ensures precise and reliable facial recognition at all times.

No bias
Designed to work equally well across all ethnicities, ensuring fairness and inclusivity.

Extreme speed
Lightning-fast processing enables seamless access with no waiting or delays.

Top performance in all conditions
Operates flawlessly in darkness, bright light, and harsh weather conditions.

Advanced features for
future-proof security

With Justface, you gain cutting-edge access control features designed to tackle modern security challenges and ensure long-term reliability. Our advanced capabilities include:

✅ **Anti-tailgating technology**
Prevents unauthorized entry by detecting and blocking multiple individuals attempting to pass through.

✅ **Light curtain integration**
Adds an extra layer of security by detecting movement and ensuring accurate access verification.

✅ **Liveness detection**
Prevents fraud by distinguishing real faces from photos or video replays.

✅ **Secure picture matching**
Eliminates the risk of photo substitution, ensuring only the authorized person gains access.

✅ **Custom features**
Tailored solutions and special functionalities developed in collaboration with clients to meet unique security needs. Justface delivers state-of-the-art security features, keeping your access control system ahead of evolving threats.
